

Introduction to Formal Semantics

Tutorial Lecture 8: Intensional and Modal Logic

Nicolaie Dominik Dascalu, Dr. Volha Petukhova
Spoken Language System Group
Saarland University

29.06.22

- **Matrices and Intension**

Exercise 1

Exercise 2

- **Composition and Intension**

Exercise 3

- **De Re/ De Dicto**

Exercises 4

Reading:

- Coppock, E., and Champollion, L. (2021). Invitation to formal semantics. Manuscript, Boston University and New York University (Ch.13). M
- Gutzmann, D. (2020). Semantik. Semantik. Einführungen in die Sprachwissenschaft. J.B. Metzler, Stuttgart (Ch.11). NM
- Von Fintel, K., & Heim, I. (2011). Intensional semantics. Unpublished Lecture Notes. NM

Discussion

- Did you have any difficulties understanding **the main concepts**?
- Were the **exercises** difficult?
- Is there something you would like to review from **tutorial 7**?

Exercises

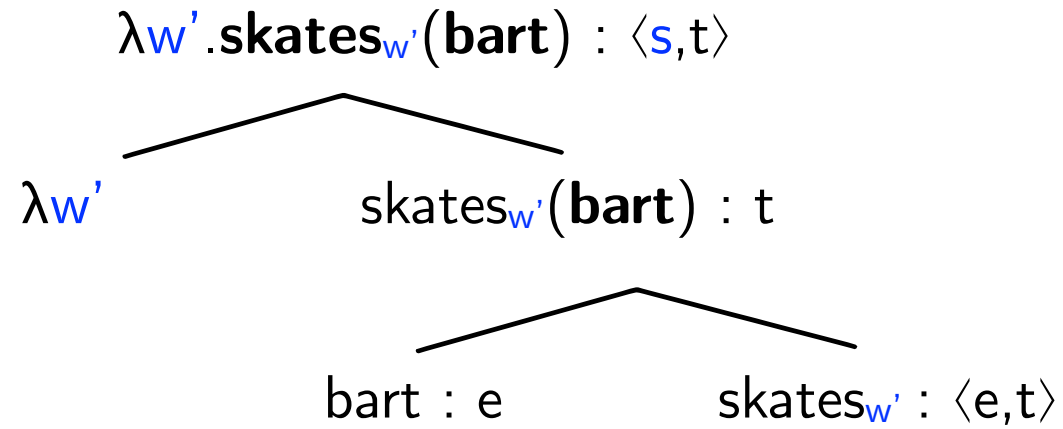

Exercise 1

- $\llbracket \text{homer} \rrbracket = [[w_1 \mapsto 1], [w_2 \mapsto 0], [w_3 \mapsto 0]]$
- $\llbracket \text{ToSkate} \rrbracket = [[w_1 \mapsto [[\text{lisa} \mapsto 1], [\text{bart} \mapsto 1], [\text{homer} \mapsto 1]]], [w_2 \mapsto [[\text{lisa} \mapsto 1], [\text{bart} \mapsto 1], [\text{homer} \mapsto 0]]], [w_3 \mapsto [[\text{lisa} \mapsto 0], [\text{bart} \mapsto 1], [\text{homer} \mapsto 0]]]]$
- $\llbracket \text{bart skates} \rrbracket = [[w_1 \mapsto 1], [w_2 \mapsto 1], [w_3 \mapsto 1]]$
- $M_{\{w_1, w_2, w_3\}} \models \Box \text{ Bart skates.}$

Exercise 1

(6) ... is Spiderman.

a. $(\llbracket \text{Clark Kent} \rrbracket^{M,g} = \llbracket \text{Spiderman} \rrbracket^{M,g})(w_1) = ?$

b. $(\llbracket \text{Peter Parker} \rrbracket^{M,g} = \llbracket \text{Spiderman} \rrbracket^{M,g})(w_2) = ?$

c. $(\llbracket \text{Andrew Garfield} \rrbracket^{M,g} = \llbracket \text{Spiderman} \rrbracket^{M,g})(w_3) = ?$

d. $(\llbracket \text{Tom Holland} \rrbracket^{M,g} = \llbracket \text{Spiderman} \rrbracket^{M,g})(w_4) = ?$

w_1 = marvel comics, w_2 = marvel Sony universe, w_3 = marvel sony universe, w_4 marvel cinematic universe

Exercise 2

$$(6) \quad \downarrow \llbracket a \rrbracket \quad \downarrow \llbracket b \rrbracket \quad \downarrow \llbracket c \rrbracket \quad \downarrow \llbracket d \rrbracket$$
$$\begin{bmatrix} w_1 \mapsto 1 \\ w_2 \mapsto 1 \\ w_3 \mapsto 1 \\ w_{\text{@}} \mapsto 1 \end{bmatrix} \quad \begin{bmatrix} w_1 \mapsto 0 \\ w_2 \mapsto 1 \\ w_3 \mapsto 0 \\ w_{\text{@}} \mapsto 1 \end{bmatrix} \quad \begin{bmatrix} w_1 \mapsto 0 \\ w_2 \mapsto 1 \\ w_3 \mapsto 0 \\ w_{\text{@}} \mapsto 1 \end{bmatrix} \quad \begin{bmatrix} w_1 \mapsto 0 \\ w_2 \mapsto 1 \\ w_3 \mapsto 1 \\ w_{\text{@}} \mapsto 1 \end{bmatrix}$$

w_1 = marvel comics, w_2 = marvel Sony universe, w_3 = marvel sony universe, w_4 marvel cinematic universe

Exercise 2

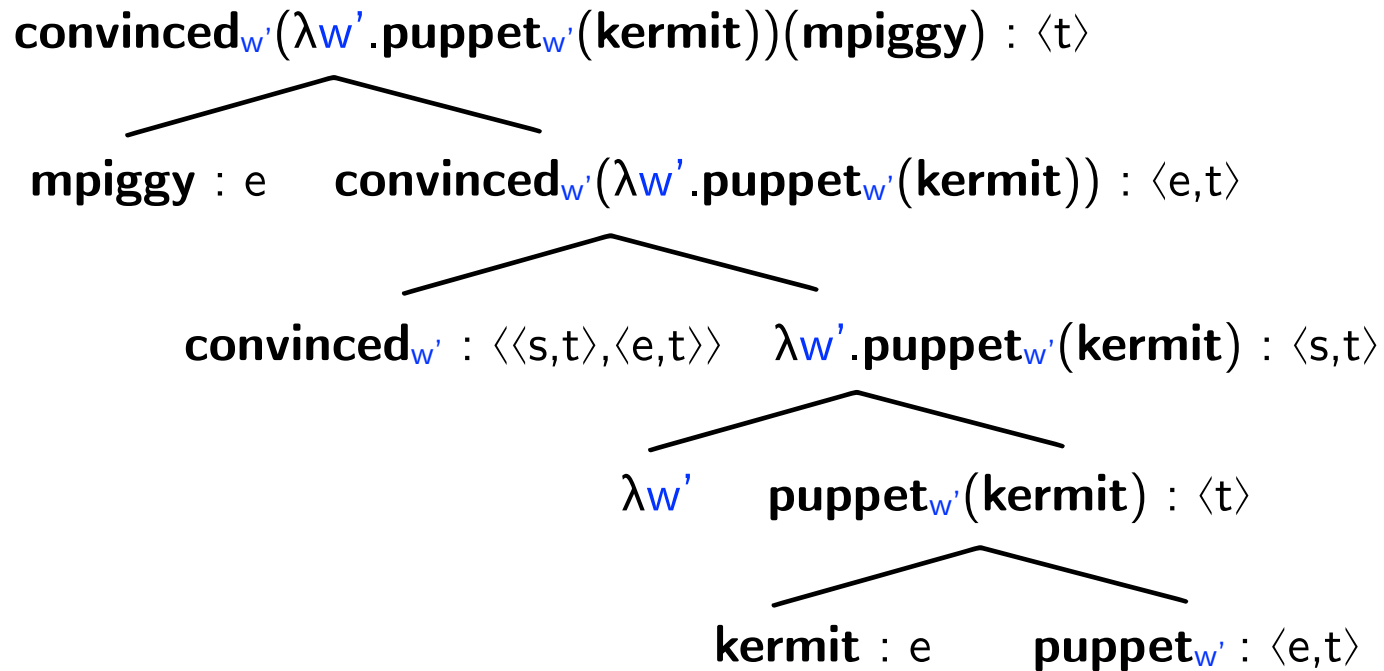

Exercise 2

- (6)
- | | | |
|--------------------------|-----------|---|
| a. $M_{\{w@,w1,w2,w3\}}$ | \models | \Box Peter Parker is Spiderman |
| b. $M_{\{w@,w2\}}$ | \models | \Diamond Toby Maguire is Spiderman |
| c. $M_{\{w@,w2\}}$ | \models | \Diamond Andrew Garfield is Spiderman |
| d. $M_{\{w@,w3\}}$ | \models | \Diamond Tom Holland is Spiderman |

Exercise 3.1

Exercise 3.2

(1) John believes miss America is bald.

a. $[\lambda x. \text{Bel}(w, \text{john}(w), \lambda w_1. \text{Bald}(w_1, x))](m(w@))$

b. $\text{Bel}[w, \text{john}(w), \lambda w. \text{Bald}(w, m(w))]$

► De Re: a specific e' (\dots, x) at a specific w' (w, x) is *Bald*.

► De Dicto: whoever m is at a given w , is *Bald*.

The speaker has no specific entity in mind. It's just an informative account.

(2) Chris is confident that someone will pass the exam.

a. $[\text{Con}(\text{chris}, \wedge \exists x [\text{PassExam}(x)])]$ **De Dicto**

b. $\exists x [x \wedge \text{Con}(\text{chris}, \wedge [\text{PassExam}(x)])]$ **De Re**

**If you need further help or have
additional questions,
please contact us.**

**Thank you all
for the kind
attention!**
